

Carlswark Cavern Stoney Middleton

Eyam Dale shaft. Large ring bolt on the top step, but better to use a tree. Two eco-hangers for Y-hang. Descend past stacked deads to a narrow section then continue to the foot of the shaft where a low crawl leads to a large phreatic passage. Follow this to a junction; right leads to the Gin Entrance and straight on to the far reaches of the cave.

Flower Pot. Vertical pipe entrance is difficult to exit - short ladder, belayed to a scaffold bar recommended.

Equipment:

Eyam Dale Shaft:

16m rope, 2 maillons, sling and karabiner (for tree belay)

Flower Pot

5m wire ladder & scaffold bar.
